

IN THE SPECIFICATION

Please replace the paragraph of the specification at page 13, lines 4-8 with the following amended paragraph:

--The rights information 67, tool list 68, and control graph 69 are applied to the PSI generator~~59~~ 61 in this first embodiment described above, but it could be applied directly to the multiplexer 62. A simpler transmission apparatus can be provided in this case because the rights information 67, tool list 68, and control graph 69 are not contained in the program-specific information.--
